1. BIOMECHANICAL SHAPE
2. CLOSED-CELL FOAM
3. STABILIZER CAP

Based on the principles of podiatric medicine, Superfeet’s shape, design and manufacture have set the standard for support and earned over 40 U.S. and International patents along the way. Superfeet insoles help adapt the flat, 2-dimensional midsoles of your footwear to your 3-dimensional foot. The distinct Superfeet shape helps to stabilize the foot, while the deep, structured heel cup and full-length foam provide support and comfort.

SCIENCE IN EVERY LAYER
Based on the principles of podiatric medicine, Superfeet’s shape, design and manufacture have set the standard for support and earned over 40 U.S. and International patents along the way. Superfeet insoles help adapt the flat, 2-dimensional midsoles of your footwear to your 3-dimensional foot. The distinct Superfeet shape helps to stabilize the foot, while the deep, structured heel cup and full-length foam provide support and comfort.

1. Structured Heel Cup: Encapsulates and positions the soft tissue under the heel, maximizing natural shock absorption.
2. Rearfoot Support: The support you feel towards the back of your arch and the front of your heel is the distinct Superfeet shape stabilizing the rearfoot.
3. Firm Stabilization: A firm foam layer and a stabilizer cap combine to create the supportive shape that Superfeet are famous for.

THE THREE KEYS TO EVERY INSOLE
1. Structured Heel Cup: Encapsulates and positions the soft tissue under the heel, maximizing natural shock absorption.
2. Rearfoot Support: The support you feel towards the back of your arch and the front of your heel is the distinct Superfeet shape stabilizing the rearfoot.
3. Firm Stabilization: A firm foam layer and a stabilizer cap combine to create the supportive shape that Superfeet are famous for.

THE THREE KEYS TO EVERY INSOLE
1. Structured Heel Cup: Encapsulates and positions the soft tissue under the heel, maximizing natural shock absorption.
2. Rearfoot Support: The support you feel towards the back of your arch and the front of your heel is the distinct Superfeet shape stabilizing the rearfoot.
3. Firm Stabilization: A firm foam layer and a stabilizer cap combine to create the supportive shape that Superfeet are famous for.

THE THREE KEYS TO EVERY INSOLE
1. Structured Heel Cup: Encapsulates and positions the soft tissue under the heel, maximizing natural shock absorption.
2. Rearfoot Support: The support you feel towards the back of your arch and the front of your heel is the distinct Superfeet shape stabilizing the rearfoot.
3. Firm Stabilization: A firm foam layer and a stabilizer cap combine to create the supportive shape that Superfeet are famous for.

PROPER SIZING OF YOUR SUPERFEET
1. CORRECT WIDTH & LENGTH
2. TOO NARROW - TOO SHORT
